

Construction Discovery Shadow Program

BX Civil & Construction is a heavy highway construction company providing services in concrete paving, guardrail, structure repair, erosion control and other various areas. As a leader in our industry, we work with state-of-the-art equipment and technology and are always looking to develop the workforce of our future.

BX Civil & Construction developed the Construction Discovery Shadow Program to expose young people to the heavy highway construction field.

What is the Construction Discovery Shadow Program?

- 20-hour time commitment:
 - On-site observatory experience at jobsites within the area
 - Small, manageable sessions with plenty of time for questions
 - Flexible scheduling based on student availability
 - All personal protective equipment (PPE) is provided for the student
- Shadow and talk with professionals in the industry regarding:
 - Project management
 - Field technology
 - Field supervision
 - Equipment operation
- A free program for High School Students
 - Limited space is available so apply early

Who is this program for?

- High school students who are:
 - Grades 10-12
 - Interested in starting their career in construction upon graduating high school.
 - Interested in attending a trade school or community college focusing on Construction Management, Heavy Equipment Operator, or Diesel Mechanics.
 - Interested in pursuing post-secondary education at a 4-year college majoring in civil engineering or construction management.
 - Interested in options for summer work between post-secondary class schedules.

Program Requirements:

- Interested students must complete the application process and attend an informational meeting with their parents prior to beginning the program.
- Program waiver signed by parent and student prior to beginning the program.
- Student must be able to get to and from the BX Project Office in Dell Rapids on their own for scheduled sessions.
- Understand this is strictly an observatory program and students will not be allowed to participate in the work being done.
